## INTRODUCTION

---

I am a highly motivated and skilled professional with a background in web development and expertise in frameworks like Node.js with Express, Laravel, and Django. I am eager to enhance my skills through hands-on experience and active involvement in real-world projects, continuously learning and expanding my expertise as a Backend Web Developer or API Engineer.

## SKILLS

---

**Programming Skills:** JavaScript, PHP, Java, C, Python, C Sharp Dot Net

**Frameworks:** Laravel, Express JS, Django, React JS, Bootstrap, Material UI

**Tools:** Node JS, Postman, Restful API, Swagger, Git, SQL, ORM

**Soft Skills:** Communication, Problem-solving, Teamwork, Adaptability, Time Management, Conflict Resolution

## PROJECTS

---

### Node.js Backend Developer - Sales Management Platform APIs

- Developed a Node.js backend application for a sales management platform, focusing on architecting and implementing APIs and handling database operations.
- Utilized Node.js as the backend runtime and any preferred framework (e.g., Express.js) for building the APIs.
- Used a SQL database (e.g., MySQL) for data storage and implemented efficient database operations and query strategies.
- GitHub Link: [Click Here](#)
- Hosted On: [Click Here](#)

### Express.js CRUD Operation API

- Developed an Express.js API for performing CRUD operations.
- Implemented Create, Read, Update, and Delete (CRUD) functionality for managing data.
- Built endpoints to create, retrieve, update, and delete resources.
- Utilized Express.js framework to handle HTTP requests and responses.
- Designed the API to handle various data models and ensure data integrity.
- GitHub Link: [Click Here](#)

### Laravel API for Milk Management System

- Developed a Laravel API for a Milk Management System, providing endpoints for managing milk deliveries, users, and related data.
- Implemented features such as user authentication and authorization, input validation, and error handling to ensure data integrity and system security.

- Designed the API with scalability in mind, following modular design patterns and best practices in Laravel development.
- GitHub Link: [Click Here](#)

### **Dairy Milk Management System - ReactJS and Laravel API**

- Built a comprehensive Dairy Milk Management System using ReactJS for the frontend and Laravel API for the backend.
- Implemented various features for managing dairy milk operations, including tracking milk deliveries, inventory management, and customer information.
- Used ReactJS to create an interactive and user-friendly frontend interface.
- Developed a robust backend API using Laravel to handle data processing, storage, and retrieval.
- Ensured seamless communication between the frontend and backend by integrating the ReactJS frontend with the Laravel API.
- GitHub Link: [Click Here](#)

### **Ezy Rentals - Car Rental Management System**

- Developed Ezy Rentals, a car rental management system using PHP OOP.
- Features include car tracking, bookings management, and registration/login functionality for admins and customers.
- Admins can add/delete cars, view booking information, and manage the rental fleet.
- Customers can register, view available cars, search, and make bookings.
- Implemented secure login and registration processes with password verification.
- Designed for flexibility, allowing customization of website design elements.
- Aims to provide an efficient and user-friendly car rental management experience.
- GitHub Link: [Click Here](#)

### **Fullstack Shoes Store - Laravel Web Application**

- Developed a full-stack Shoes Store web application using Laravel.
- Implemented features that allow users to purchase shoes using the Khalti payment gateway.
- Included user authentication functionality through Breeze for secure access to the website.
- The web application is currently hosted on <http://www.kumarchaudhary.lovestoblog.com/>.
